NASA SEWP VI
Ordering Guide

SEWP Overview

The NASA SEWP (Solutions for Enterprise-Wide Procurement), pronounced "soup", provides the latest Information Technology, Communication, and Audio-Visual (ITC/AV) solutions and services for all Federal Agencies and their approved contractors. Created in 1993, SEWP I was the first Government-Wide Acquisition Contract (GWAC) in the federal acquisition space. Originally, the contract vehicle provided only technology products for NASA and all other agencies. SEWP has continually evolved over the past 30 years, expanding its scope to meet the requests of its customers. The SEWP vehicle represents acquisition innovation within the Federal Government. The program is self-funded through usage fees (0.34%) and provides all Federal agencies with acquisition support - more than 50,000 orders a year.

About Foxhole Technology

Founded in 2007, Foxhole Technology (Foxhole) is a veteran-founded, employee-owned IT engineering firm delivering mission-critical technology solutions across the Federal Government. Our four core service areas – Cybersecurity, DevSecOps, IT Modernization, and Innovation-as-a-Service – encompass enterprise cyber operations, cloud and infrastructure engineering, application development, systems integration, Zero Trust, and emerging AI-enabled capabilities. Foxhole combines proven operational delivery with in-house research and development to help Federal agencies strengthen security, modernize systems, and improve mission performance. With $500M+ in prime contract awards, Foxhole maintains a Top Secret Facility Clearance, CMMI-DEV and CMMI-SVC Maturity Level 3 appraisals, ISO 9001, ISO 20000-1, ISO 27001, and ISO 28000 certifications, and CMMC 2.0 Level 2. Our record of exceptional CPARS ratings demonstrates consistent, high-quality execution.

NASA SEWP VI
Ordering Guide

SEWP VI Scope

SEWP is designed to provide a broad suite of Information Technology, Communication and Audio Visual (ITC / AV) solutions and services. Technology is ever-evolving and for that reason SEWP's processes enable our Contract Holders to add new commercial technology and IT services to their contract daily, as requested by our customers. The focus of SEWP is on the full suite of technology offerings that simplify Governmental access and industry offerings across the entire ITC/AV solutions and services landscape. SEWP is composed of three (3) scope categories below. If you would like SEWP to determine if your requirement is within scope of the SEWP VI contract, please send an overview and/or bill of materials (BOM) to help@sewp.nasa.gov and they will quickly review and provide feedback.

The SEWP Contracts were awarded by scope category, the three categories are:

- ***Category A – ITC/AV Solutions***
- ***Category B – Enterprise-Wide ITC/AV Service Solutions***
- ***Category C – Mission-Based ITC/AV Service Solutions***

Fair Opportunity

In accordance with FAR 16.505(b), ordering agencies must provide SEWP VI Contract Holders a fair opportunity to be considered for applicable task orders, unless an authorized exception applies. Agencies are encouraged to use the NASA SEWP online Request for Quote (RFQ) tool to distribute requirements, solicit competitive quotes, and support fair opportunity procedures. The SEWP QRT will automatically include the Contract Holders within a selected Group or based on a suggested source.

Foxhole Technology (Contract 80TECH26D0339) is a Category B Contract Holder eligible to compete for enterprise-wide ITC/AV services across all 11 Category B Technical Areas. Foxhole responds to RFQs in accordance with SEWP procedures, quoting only solutions and services available under its contract. Ordering agencies retain responsibility for evaluating quotes, documenting selection decisions, and determining price reasonableness in accordance with applicable acquisition regulations.

Ordering Process

Federal agencies and authorized ordering activities may acquire enterprise-wide ITC/AV services through NASA SEWP VI using their established procurement procedures. Typically, an agency identifies its requirements, develops a Purchase Request (PR), and submits the request with appropriate funding documentation to its contracting office.

The Contracting Officer (CO) may use the NASA SEWP online RFQ tool to solicit quotes from eligible Contract Holders, including Foxhole Technology. Following evaluation and contractor selection, the ordering agency issues a task order using its authorized ordering documentation and procedures.

The NASA SEWP Program Management Office (PMO) processes and tracks orders and forwards them to the selected Contract Holder. The issuing agency remains responsible for compliance with applicable acquisition regulations and agency-specific policies. Order modifications must also be routed through the SEWP PMO.
